

Starship Building 5422 Renovation  
Fort Jackson, Contract No.: W91278-11-D-0062 TO DW01

---

April 5, 2013

Trinity Industrial Services

Attn: Tom Frost

Tom,

It's important for Carothers Construction to not only identify and bring to closure Safety Violations on a project site, but also to bring the positive to surface and recognize those workers and Supervisors that not only, on a day to day basis, take a proactive approach, but also contribute to the entire site.

With the understanding that there have been some safety concerns in the past, Trinity has definitely made safety a forward thinking process that it has, on a daily basis made sure that the workers are not only in compliance with the project regulations, but also on the administrative side.

With the quick and tangible results, I personally wanted to say Thank You for Trinity's support in ensuring that all workers on the site are not only working to stay in compliance but also looking forward to what they will need ahead of them. This proactive approach will ensure that no one gets hurt and they all go home to their family's each day.

Thanks again for your continued support on the Starship 5422 Renovation Project.

Should you have any questions, Please feel free to contact me.

Respectfully,

Bill Butler  
Site Safety Manager  
Carothers Construction
